

AIRVIA Medical's air purifiers are **high-end** products which combine **all the best filtration technologies**:

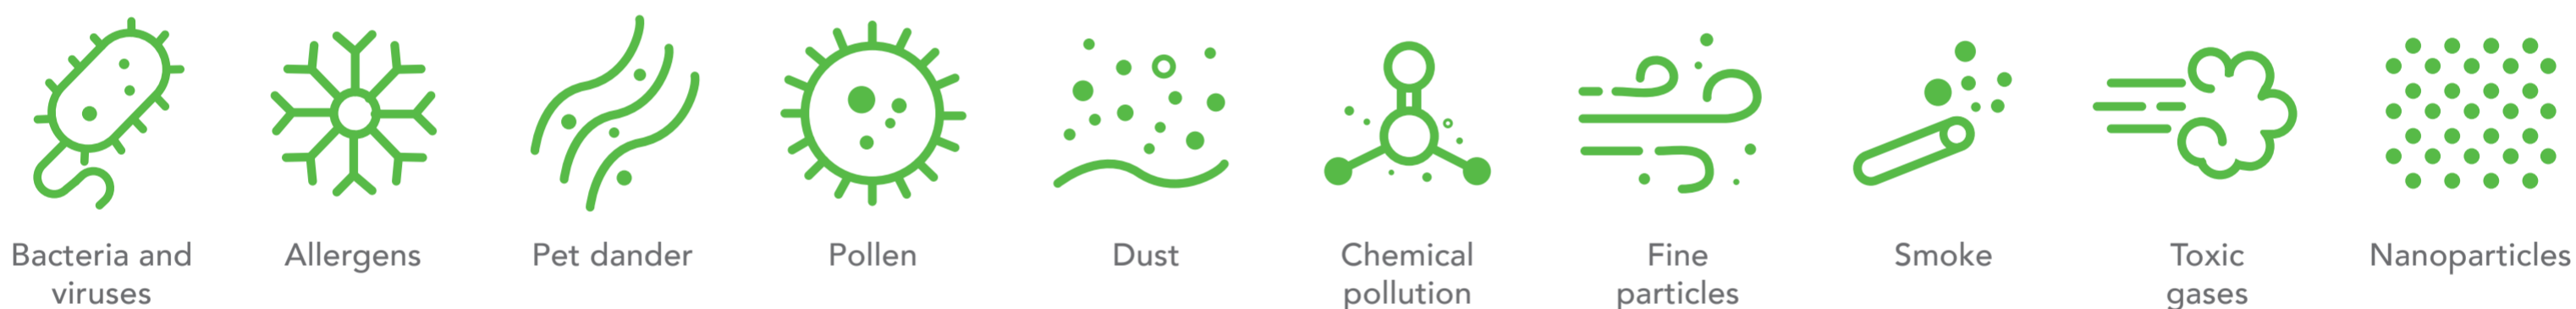

- Prefilter
- Bamboo fibre
- H13 HEPA filter
- Activated carbon
- Photocatalysis
- UVC light
- Ionisation

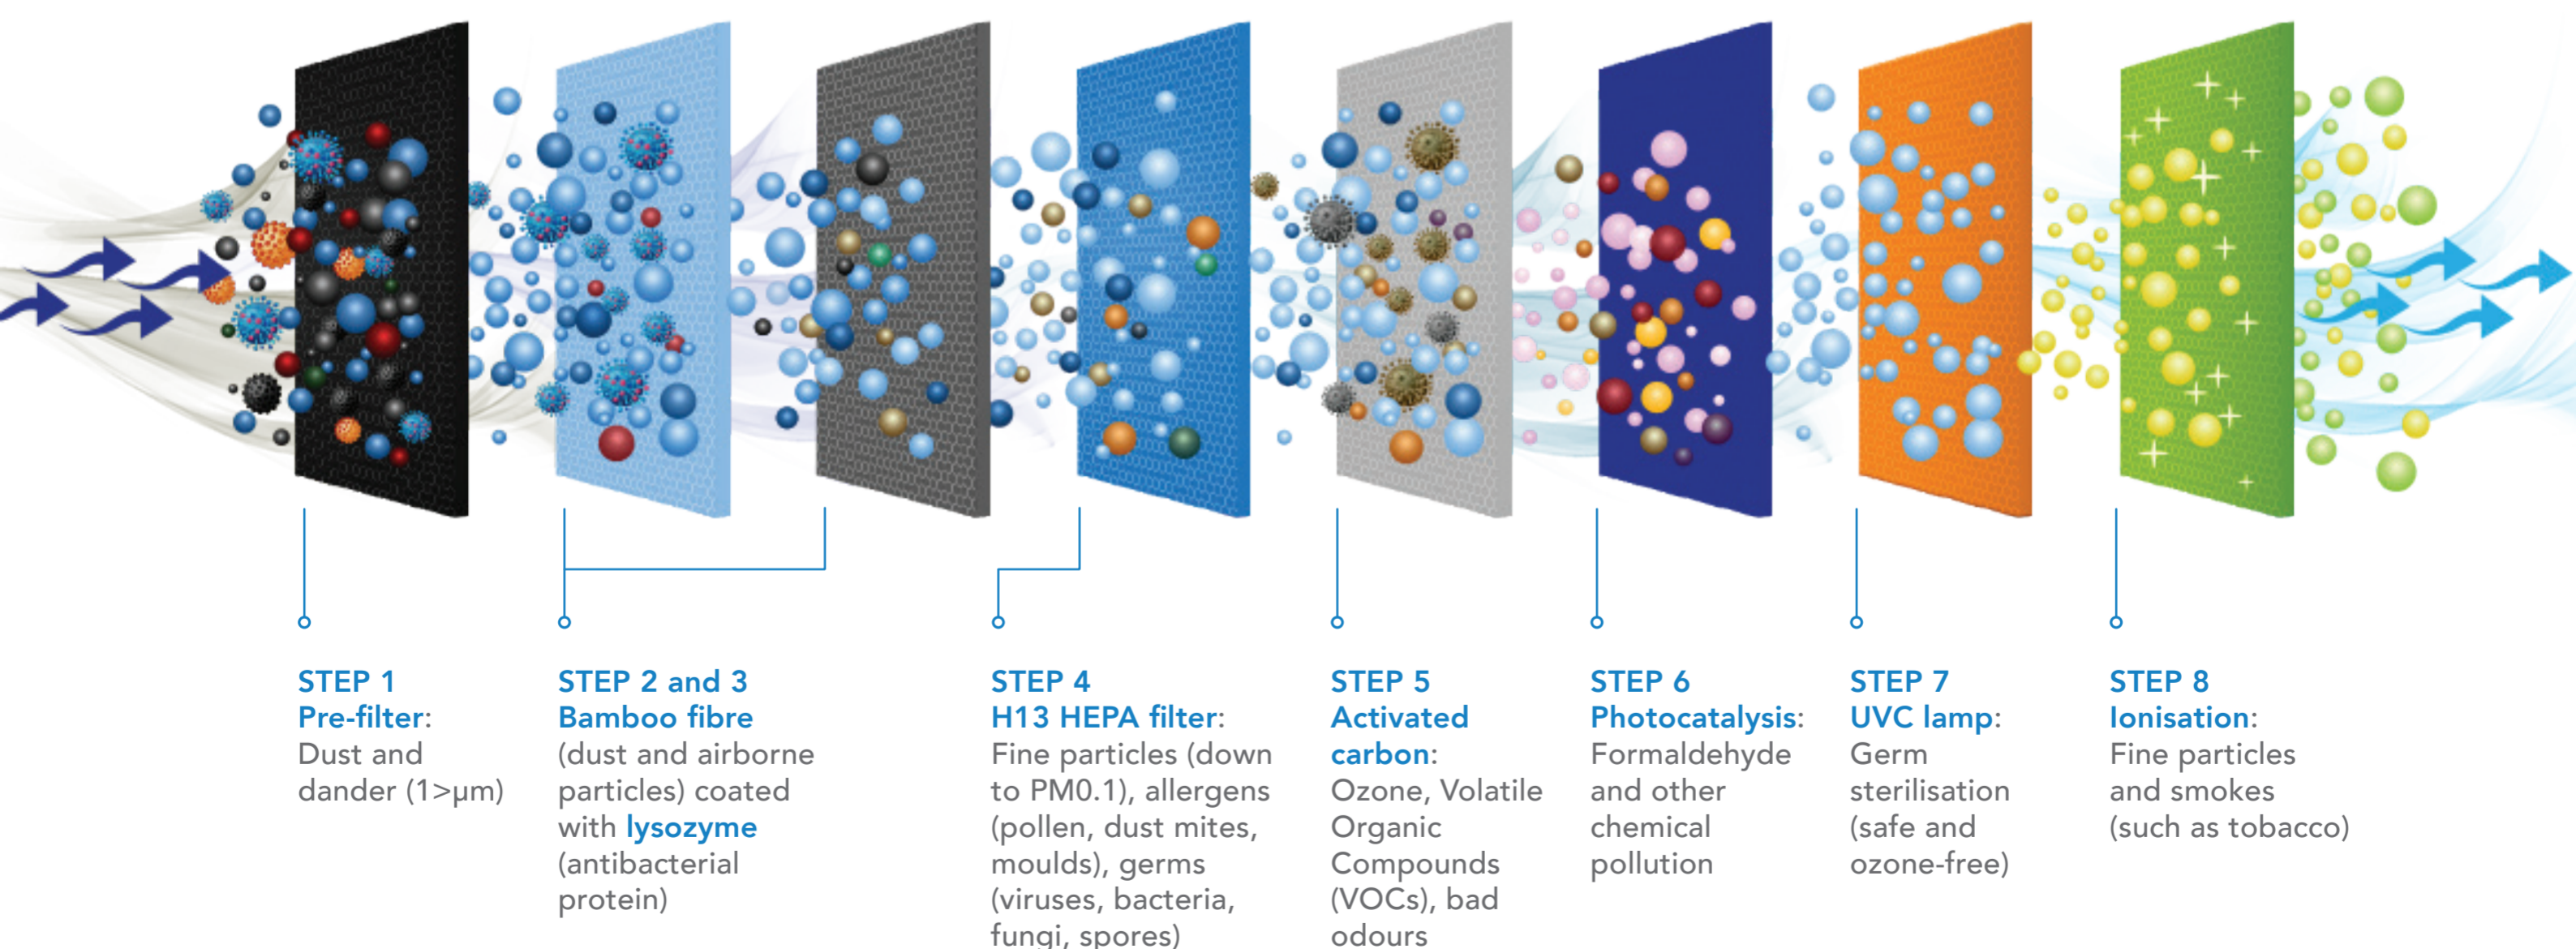

The design of our devices is inspired by aircraft turbines, permitting them to be both **quiet** and **powerful**. Our air purifiers filter more than 99.97% of fine particles, all the way down to a size of 0.01 microns.

They have a very broad spectrum of action and act on all types of air pollution.

A multi-layer filter

We use an advanced **8-step filtration process**, which allows for unparalleled efficacy, power and range of action.

We are a French company specialising in air purification, and we stand behind the quality and efficacy of our products. If you have any questions, feel free to contact us at info@airviamedical.com.

The air in this space is purified by an **AIRVIA Medical** air purifier

“
We clean the air and
take care of your
respiratory health.
”

The air here is

PURIFIED

by a high-quality air purifier
